### Position Summary

Reporting to the Manager of Design and Construction in Engineering Services, the Design Engineer-Vertical is responsible to manage large multi-disciplined capital projects from budget estimates, planning, procurement, environmental assessments, design through to commissioning. The Design Engineer facilitates the project management of capital projects primarily in water and wastewater facilities with effective leadership, working with a diverse team of professionals.

- Duties include, but not limited to:
- Highly developed project management skills in collaboration with proven leadership skills in delivering the capital works projects within vertical infrastructure
- Proven problem solving and decision-making skills with strong engineering principals when providing engineering advice and recommendations
- A high level of integrity, as an effective leader, with excellent verbal and written communication skills
- A strong awareness of municipal government and of pertinent legislation, standards, regulations and policies within local, provincial and federal governments

- Liaise with governing and approval agencies, stakeholders, developers, consultants, contractors, internal staff and external agencies
- Leads by example with a strong ability to support, coach and mentor staff within a multi-functional and collaborative team environment.
- Competent in the use of computer programs in particular Microsoft programs

## Qualifications

- Four year University degree in Engineering (Civil or Environmental preferred)
- Professional Engineer Designation in Ontario or eligible for designation in Ontario
- Project Management Professional (PMP) certificate is an asset
- Five (5) years plus of relevant experience within the design and project management of vertical municipal infrastructure.
