

# Senior Project Manager – Water & Wastewater Planning

**Permanent, full-time** leadership opportunity with Hamilton Water in **Hamilton, ON**

If you're a Professional Engineer, Certified Engineering Technologist or similarly qualified professional with related municipal experience, here's your chance to make your mark as a Senior Project Manager, Water/Wastewater Planning on the City of Hamilton's water and wastewater infrastructure.

Reporting to the Manager of Water and Wastewater Systems, and providing leadership to staff within a Business Unit, you will facilitate a team environment focused on providing expertise on the operation and optimization of existing systems support, long-range planning/system design and engineering necessary for the City's wastewater linear systems, plants and outstations (Sanitary and Combined sewer systems).

**Your qualifications as a Senior Project Manager – Water & Wastewater Planning include:**

- Extensive demonstrated knowledge of the practices and theories of Civil Engineering and/or Environmental Science normally acquired by obtaining a degree or diploma in a related field and progressive work experience.
- Membership with Professional Engineers Ontario or the Ontario Association of Certified Engineering Technicians and Technologists, preferred.
- Extensive demonstrated knowledge in the areas of municipal water and wastewater infrastructure planning/systems design, and engineering, including knowledge of conveyance, plant processes, outstation design, linear system and process hydraulics for water/wastewater distribution, collection and management.
- Highly effective leadership, facilitation, communication, presentation, interpersonal and organizational skills.
- Leadership experience, including guiding and developing staff, and performance management of staff when required.
- Extensive project management experience in a water/wastewater environment, including the application of project management tools and best practices as endorsed by the Project Management Institute (PMI) or equivalent.
- Demonstrated knowledge of dynamic computer hydraulic modelling and associated software, including model development, calibration, operations and governance.
- Experience in investigating, recommending and documenting new/updated policy/procedures for improving the section's technical performance, following Quality Management System (QMS) theory/environments.
- Highly developed ability to articulate a vision and to lead and inspire others, and experience in designing and delivering customer-focused programs and services.

This permanent, full-time position offers a wage range of \$53.078 to \$62.080 per hour (based on a 35-hour work week schedule).

**Hamilton. A city of progress.**

At the **City of Hamilton**, our vision is "to be the best place to raise a child and age successfully." With our rich history, culturally strong and diverse communities, blend of urban and rural attractions, and ideal location in the heart of the Golden Horseshoe, Hamilton is a vibrant community of neighbours. We are also a leading employer, with many opportunities to grow and excel. We invite you to share in our vision as part of the Hamilton Water Division in the Public Works Department.
