

Project Engineer (Project Management)

Job Posting: 39-2019

Posted: May 2, 2019

Duties

- Reporting to the Manager of Engineering, the Project Engineer utilizes project management skills and technical knowledge and experience in Municipal, Traffic and Civil Engineering to plan and direct a comprehensive program of construction and system renewal for all municipal sanitary, storm, road, bridge, water and other designated municipal infrastructure.
- Acts as Project Manager for civic infrastructure, corporate development improvement and maintenance projects.
- Responsible for project management, from planning through to design and construction of City capital and corporate development projects on time and on schedule.
- Manage Municipal Class Environmental Assessments and Environmental Compliance for transportation, road and municipal infrastructure renewal projects.
- Professionally supports recommendations of critical evaluations regarding transportation engineering, planning, modelling, demand management, impact analysis, demand forecasting and systems; traffic planning; evaluation, long range transportation network assessment; analytical modelling and research techniques and methodologies.
- Responsible for planning and implementing a wide variety of capital projects throughout the Corporation including developing and advising on detailed project management tools.
- Ensures projects remain on time and on schedule.
- Interviews and recommends project contractors and consultants.
- Liaise and work with staff, senior management, internal stakeholders, external agencies, developers, consultants and the public.
- Provides management direction to employees by planning, assigning and supervising work as well as providing guidance and advice.
- Prepare detail costing for engineering, developing and corporate projects and engineering elements of other divisional capital projects to be integrated into departmental budgets and capital forecasting.
- Comply with all workplace Health and Safety Policies and Procedures including but not limited to: attend and participate in all H&S training and education activities; identify and report all H&S risks, accidents, incidents, injuries and damage and ensure all activities are carried out in a safe manner including the proper use of all assigned personal protective equipment.
- Perform other related duties as assigned, including recording revisions to contract documents.

While we appreciate all applications received, only those selected for an interview will be contacted.
